Experience

Full Stack Web developer (Personal Projects)

Duration: May 2024 - Present

Experience: 1.5 Year (Hands-on)

Description:

I have 1.5 years of hands-on experience in full-stack web development, during which I built several practical projects to strengthen my technical skills. I continuously learn new technologies and improve my development abilities.

Key Projects:

- **TodoSync – Task Management Web App**

  Built a secure full-stack Todo Web App with JWT-based authentication, password hashing with bcrypt, and personalized task management. Implemented advanced filters (search, sort, pending, completed, today, upcoming, etc.) to enhance usability.

- **PakStats - Pakistan Statistics dashboard**

  Developing a data visualization dashboard using React that displays Pakistan's key economic and social indicators (poverty, trade, inflation, education, etc.) through interactive charts. User can also compare with other countries through interactive charts.

- **Portfolio Website**

  A personal portfolio website built using React to showcase my skills and projects as a Web developer. The site is continuously being updated and improved as I learn and explore new technologies.

- **MediaHub- Multimedia Search & download**

  Media Hub is a responsive web application built with React that allows users to search, view, and download high-quality images, videos, and audios from public APIs. It showcases modern frontend development skills, API integration, and interactive UI design.

- **Website Clones & UI Practice Projects**

  Created several frontend clones of websites as part of self-learning and UI development practice. These projects helped strengthen my skills in layout design, responsiveness, and understanding modern web structure.

Technologies Used:
React, Node.js, Express.js, MongoDB, Vite, JWT, REST APIs, Git, GitHub.
